

Accounting

The Company:

Titan Controls is a growing Calgary based company specializing in distribution of Industrial Monitoring and Instrumentation products. We have an immediate opening for a Lead Accounting position in our Calgary office with a strong desire to grow and succeed.

Position Summary:

Reporting to Management, you will be responsible for growing Titan Controls sales and fostering relationships with our existing and prospective customers, including the execution of effective accounting strategies. Titan Controls product focus consists of fire and gas detection manufactured in house by Xtreme Safety Technologies. Experience with these or similar types of products would be considered an asset.

Key Responsibilities:

- Reporting and analysis on financial health of projects for both Titan Controls and Xtreme Safety Technologies Inc.
- Reports monthly and quarterly project financial status to President in a timely manner with emphasis on outstanding issues, potential changes, and adverse trends or risks, and financial metrics including EBITDA, margins, S-curves, economic value added, indirect cost, etc.
- Supports the Management of Change process to identify and record all scope changes and the impact on cost, schedule and quality.
- Participates in lessons learned reviews providing feedback to the organization and develops best practices and procedural guidelines to ensure that the lessons and accomplishments are carried forward to future projects.
- Responsible for the timely and accurate development of the project budget and work breakdown structure and subsequent estimates as well as analysis of actual results. This requires planning, organizing, and following-up on data required to meet both external and internal reporting requirements and due dates. This will encompass a variety of tasks and requires a widespread knowledge of the operation, as well as general product knowledge.
- Reconcile projects, tracks actual vs. proposed costs for project tasks or deliverables based on time reporting and other tracking systems.
- Support Titan Controls sales team and conduct weekly meetings with projected numbers approved by the President.

Key Qualifications:

- Minimum 1 years experience in accounting, preferably in manufacturing or oil and gas industries.
- MUST HAVE solid understanding of accounting set up for manufacturing process experience using software for accounting functions.
- A related post-secondary degree or diploma.
- Enrollment in CGA or CMA accounting designation program.
- Detail oriented and reliable.
- Computer experience with MS Office.
- Must pass drug, criminal and medical screening and education verification.

Compensation:

- Titan Controls offers a competitive compensation
